Distribution centers

Agenda

- 1. Navigating Innovation
- 2. Measuring Success of Al Products
- 3. Using Artificial Intelligence (AI)/
 Machine Learning (ML)

Most Al labs are built to experiment, few are built to scale

- X High experimentation, low productization
- Over-indexing on experimentation, under-indexing on delivery
- No repeatable success model
- X Lack of consistent stakeholder development

SHIFT: Repeatable, scalable innovation-led Al Product Delivery Framework

Ob	ectives
$\mathbf{O}_{\mathbf{N}}$	

 Align on Enterprise priorities and user problems with Al lens

Spark Ideation

List 'Big Rocks'

Hypothesize

- Experiment Al solutions
- Build f of corep.
- Technique ild to evaluation

Build and launch production ready

Implement MVP

- Scale Infrastructure
 - Drive Adoption
 - Prepare for Hand Off

Fuel Growth

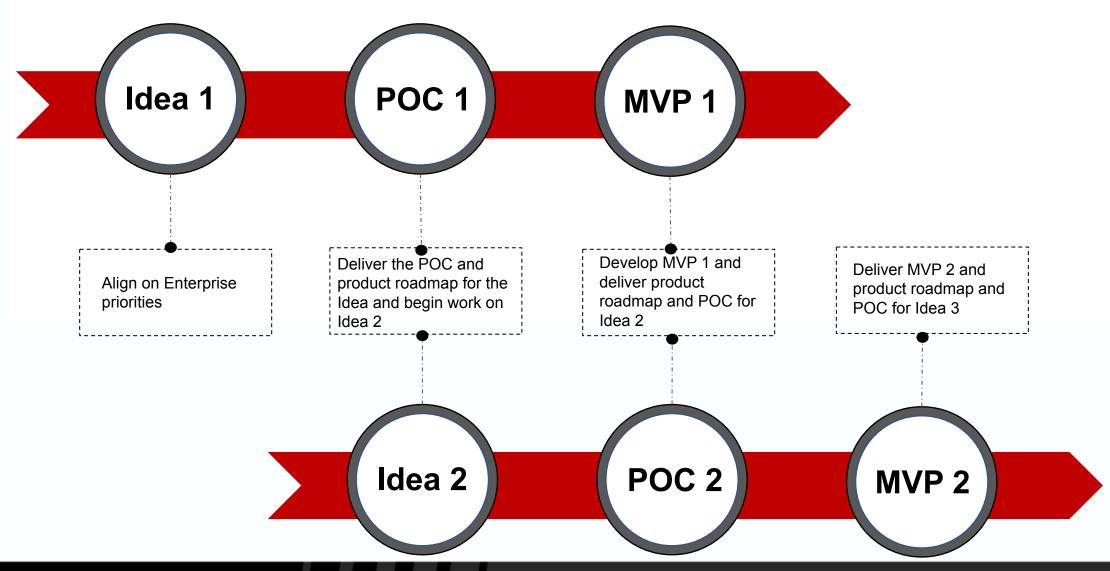

Transfer

 Hypercare support on product hand off

- 3. Using Artificial Intelligence (AI)/
 Machine Learning (ML)

Connecting the Dots: Al Metrics to Company Outcomes

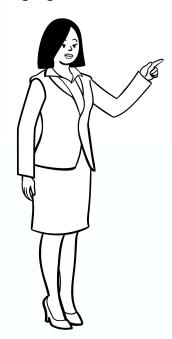

Agenda

- 1. Navigating Innovation
- 2. Measuring Success of Al Products
- 3. Using Artificial Intelligence (AI)/
 Machine Learning (ML)

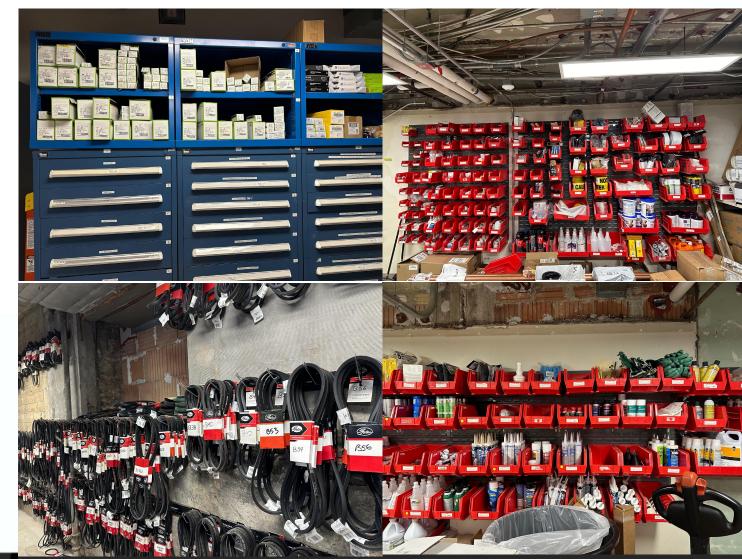

Business Problem: New customer acquisition involves several months-long process of understanding current inventory needs

New Customer: We would like Grainger to provide us with a quote for managing these inventory rooms

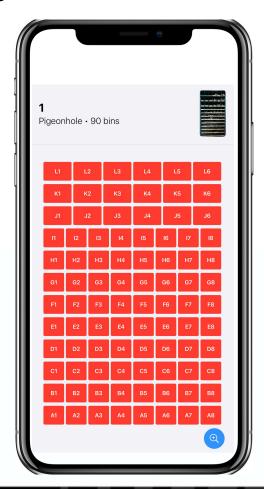

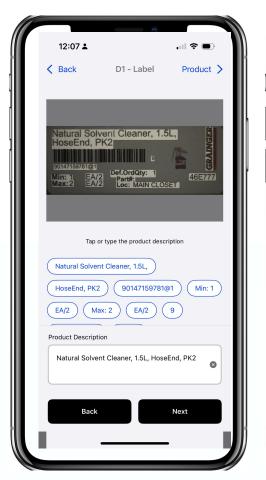

Solution: We created an offline first mobile app to collect customer storage and inventory needs using Computer Vision models

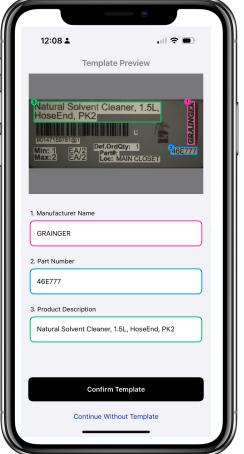

Capture Storage Information
